

UP

WOOD-BURNING STOVE

Wood-burning stove with modern lines and a firebox with a large ceramic glass and generous ash drawer. **UP** radiates a luminous heat. Made with the innovative combustion chamber raised on a steel platform, it ensures a wide view of the firebox and the flame in all its forms.

Door with steel frame, hinged opening and practical anti-burn handle. Elegant when switched off, radiant during operation, thanks to the double ceramic glass door with "NightView" finish.

The entirely steel platform was designed to hold a generous load of wood, ready when needed.

Side panels in black steel or in "Corten" version, the latter made with a latest generation paint mix. The result is a texture with warm dark brown shades.
